Re: Schlegel Corporation
EPA RCRA ID # IAD005136023

Dear Mr. Williams:

I spoke with you on the telephone during the week of October 24, 1994. During that telephone conversation, I told you that Schlegel Corporation's cooling pond inlets and discharge had been sampled. I also told you that acetone, lead, and methylene chloride were found being discharged into the cooling pond at levels above their respective drinking water standards, however, the cooling pond discharge analytical results did not show these constituents as being a discharge problem. Please be aware that I am having Schlegel Corporation/United Technologies send a copy of the reports containing these results to you within the next month. These reports will be titled January 1994 Resource Conservation and Recovery Act (RCRA) RCRA Facility Investigation (RFI) Report and January 1994 RFI Analytical Data Report. Please follow up on this information as you see fit.

If you do not receive these reports within the next month or have any questions regarding this matter, please contact me at (913) 551-7633.

Sincerely,

Brian Mitchell
